Continuation of 5. does NOT place the application in condition for allowance because: Applicant's comments with respect to claims 1, 6, and their dependents ignore the teachings of the secondary reference, which renders obvious the features on which applicant's arguments rely. Applicant's comments with respect to claims 10 and its dependents again ignore secondary reference. They also cite Claus as failing to teach elements of the claims; Claus is not part of this rejection and hence applicant's analysis of this reference is moot with respect to claim 10. The elements inherent to a microprocessor that receive the command to fetch an identifier in Claus et al. meet the limitations that applicant opines are unique to claim 15. The information used to authenticate the received hash reads on applicant's data stored in a database, as per claim 27, 31, and 35.
